

**A MECHANISM COMPRISING CLOSED-FORM SYSTEM UNITS FOR  
TREATMENT OF AGGREGATE MATERIAL AND PRODUCTION METHOD  
OF THE SAME**

- 5 An aggregate storing and classifying mechanism for production of asphalt in  
plants, comprising a body (2) having plurality of circular sections (6) arranged in  
a manner of substantially surrounding the body (2) for storing aggregate  
material comprising different gradation levels plurality of foot means (1) holding  
said body (2); corridor means (7) and channel means (15) arranged tree  
10 branch-like manner in the body (2) for distributing and storing the aggregate in  
the body (2) as homogenously; plurality of discharge mouths (4) and discharge  
covers (8) for discharging the aggregate material from the body (2) and feeding  
the aggregate material to conveyors placed under the body (2) through plurality  
of discharging axis.
